The Leopard Leap

Performance, comfort, innovation, passion and elegance are not only tag words for the multiple award-winning Leopard Catamarans line, these are at the core of the design and ethos of the yachts, their designers, builders and global team.

From the initial designs to the manufacturing process, these concepts, and the direct feedback from our owners and customers, are at the heart of developing blue water cruising capable yachts that are fun to sail, easily maintained anywhere in the world and aesthetically pleasing.

Developing and delivering the benchmark for the modern cruising catamaran, Leopard Catamarans invites you to enjoy our latest designs.

HISTORY

The making of a Leopard

In 1994, South African builder Robertson & Caine entered the catamaran market and would change the seascape of catamaran production and design forever. Modestly starting by building 5 Leopard 45s for the world's premier charter company, the team at Robertson & Caine was pleased to find that the yachts were received with unparalleled fanfare.

The catamarans proved to be so successful that another order was placed for 5 more. In less than 4 years, Robertson & Caine delivered their 100th catamaran, and every single one was delivered to its final destination on its own bottom. What better maiden trip and better proof of blue water capability than an extensive delivery passage?

Due to market demand, the relationship expanded with the launch of Leopard Catamarans in the year 2000. Sailors were impressed with the new line of catamarans coming from the Robertson & Caine factories, and were interested in purchasing them for private use, making their own choice of layout, optional gear and delivery location.

In 2007 Leopard Catamarans ventured into the power catamaran market with the introduction of the Leopard 47 power catamaran. The incredible fuel efficiency of this model made the Leopard 47 PC an instant success.

Soon after, the Leopard 37 PC was introduced to satisfy demand for a smaller powercat, and in 2011 this model was replaced with the Leopard 39 PC.

2016 marked Robertson & Caine's 25th anniversary and 1500th Leopard Catamaran delivered; further establishing a very strong position in the catamaran market. Leopard Catamarans has made impressive steps over the past decade, becoming the industry's leader in the production and delivery of quality catamarans for private and charter fleets worldwide.

With a global dealership network spanning 6 continents and 20 plus countries, Leopard owners know that there is always support nearby for parts, expertise or advice.

ROBERTSON & CAINE

ROBERTSON & CAINE

The Builders Behind the Boats

John Robertson and the late Jerry Caine founded Robertson & Caine LTD, South Africa's largest boat builder, in 1991. With over 20 years of boat building history, they have launched over 1,600 Leopard Catamarans and created a reputation for building quality cruising catamarans that are sought after worldwide.

Originally, the company created custom sailing yachts, ranging from 36ft fiberglass monohulls to 70ft state-of-the-art carbon fiber racing boats. The latest innovative offerings include the Leopard 40, Leopard 44, Leopard 48, Leopard 58, Leopard 51 Powercat and the new Leopard 43 Powercat.

These models are destined for the world's most exotic sailing grounds, including the US East Coast, the Caribbean, the Seychelles, the Mediterranean, Asia and the South Pacific.

As a result of continued innovation and quality, Robertson & Caine remains a serious competitor in the international catamaran market and continues to enjoy a dominant position in the North American market.

Robertson & Caine's Leopard Catamarans is the #1 selling brand of catamaran in North America and continues to impress with modern pioneering, while staying true to the classic feel and elegance that the Leopard range has always offered.

Robertson & Caine's production facility is headquartered in Woodstock, just a short distance from the Cape Town city center and harbor. The company is currently producing and launching approximately five boats a week and there are several new exciting projects currently in the pipeline.

LEOPARD

40

Designer/Builders Robertson & Caine and Naval Architects Simonis-Voogd have set a new standard for contemporary cruising catamarans with the launch of the new Leopard 40. The innovative interior layout, increased volume in the hulls, and expanded windows and doors that blur the lines between inside and out combine to make the interior space feel like a larger yacht.

The unique forward-facing galley stands in front of a large window with an adjacent access door to the forward platform. Aft, a forward-facing settee and dining table are separated from the aft cockpit seating area by sliding glass doors.

These doors and windows enhance the open-concept feel, allow for exceptional ventilation, and facilitate easy navigation in and around the yacht.

The raised helm station is accessible from the cockpit and side deck, allowing for easy shorthanded sailing and keeping the helmsman close to family and friends. With more than 1000 sq. ft of sail area and an optimized hull design, like all Leopard catamarans, the Leopard 40 is built to a high standard of speed and agility.

LEOPARD 45

45

LEOPARD

45

The Leopard 45 builds on the best features of previous Leopard models and is the perfect blend of interior comfort and sailing pleasure. She is sleek and nimble, yet comfortable and incorporates a heritage of Leopards spanning 25 years of product expertise.

Two areas that have received the most attention are the interior accommodation and the exterior styling. The accommodation has been thoroughly overhauled to improve comfort levels and space, as well as improving the atmosphere with more natural light, an overhead skylight, and larger hull windows and portlights. After dark, the

interior is illuminated by subtle hidden lighting, with individual spotlights to highlight certain areas.

The exterior styling has evolved from the more curvaceous deck features on previous models, into a sharper, more angular look, topped by a sleek new deck hardtop while still delivering exceptional build quality, sailing comfort across all sea states, and ergonomically designed layout options.

LEOPARD | 48

Focused on blue water performance and comfortable living, the Leopard 48 is has become one of the most popular models in the award winning Leopard line.

From the design table and factory floor of the catamaran industry's leading manufacturer, the Leopard 48 comes with the pedigree sailors have come to expect from Leopard Catamarans.

Her modern lines, open floor plan and casual elegance set a new standard for the modern cruising catamaran.

Drawing on the success of the Leopard 44, the Leopard 48 features a large forward cockpit with direct access from the saloon and foredeck. The raised helm station with easy access to the cockpit and side deck allows for shorthanded sailing while not separating the helmsman from family and friends.

LEOPARD

58

The flagship of the Leopard line, the Leopard 58 stays true to Leopard Catamarans' sleek and innovative style and is available in a selection of interior configurations ranging from 3 to 6 cabins.

The 58's interior offers ample space with either a huge saloon with multiple seating areas or a spacious saloon and large owners' cabin depending on the layout chosen.

The Leopard 58 features the signature forward cockpit

with direct access, an expansive open cockpit and an incredibly large flybridge that provides seating for up to 12 people as well as a fully outfitted, state-of-the-art helm station.

The Leopard 58 also includes a number of impressive technical design features such as the hydraulic swim and dinghy storage platform, easy-access engine rooms and a smart singlehand-ready helm station.

POWERCAT

LEOPARD POWERCAT

43

The progressive Leopard 43 Powercat highlights all of the advanced features that have come to be associated with the Leopard line. Built by Robertson & Caine and exterior design by Simonis Voogd Design, this member of the power fleet is a completely redesigned mid-sized catamaran built with a quality foundation.

The Leopard 43 PC is the logical extension of the very successful Leopard 51 PC. This contemporary catamaran boasts economy, is easy to handle, and spacious with 27% more interior volume than her predecessor.

Her new hull design amplifies her speed and agility. From the large flybridge, manoeuvring this power catamaran is not only simple, it's enjoyable. Her interior layout is in-line with an all new generation of Leopard Catamarans.

There were no details left unattended in the creation of this new power yacht, including the hull design, speed, standard specifications, updated interior, and much more.

LEOPARD TESTIMONIALS

“

“The Leopard catamaran we purchased has been a rewarding and fulfilling experience on all accounts. All the joys of physically owning and using the yacht have been great, but what has also been very rich and meaningful is to be part of the outstanding group of professionals at Leopard Catamarans. We are very happy with our yacht and the friends that we have at Leopard Catamarans”.

Allen & Patricia Valkie, “Nauti-Nauti”

”

“

“Robust build and clever design are hallmarks of the range, and over the years each new model has featured a number of smart and sometimes downright innovative ideas and refinements... It's not easy to give a loaded cruising cat satisfying sailing performance, but the designers are known for their fast-sailing boats and the 44 is as sprightly as such cats get”.

Peter Nielsen, SAIL Magazine Best Boats

”

CONNECT

Bringing Leopard Home

Staying informed and connected with the Leopard family has never been easier.

Browse the Leopard Catamarans website and social media pages like Facebook, YouTube, and Instagram. Check out current models, view videos, images, virtual tours and so much more!

You can also customize and price your ideal Leopard Catamaran using the "BUILD MY LEOPARD" tool on our website.

GLOBAL SUPPORT NETWORK

Wherever you and your Leopard are in the world, you will find a Leopard support team close to you. Also, take comfort in the fact that there are 35 worldwide Moorings and Sunsail bases with support teams ready and available for you and your new Leopard.
