LEOPARD UPGRADES 53 POWERCAT

Leopard Catamarans has debuted the 'refined' edition of its 53 Powercat, which is set to have its Asia premiere at this year's Singapore Yachting Festival.

Leopard Catamarans staged the world premiere of its the upgraded 53 Powercat at this year's Miami International Boat Show. Building upon the foundation of its predecessor, with over 140 units delivered, the new 53 Powercat is available for private owners and within The Moorings Yacht Ownership Program, which offers a guaranteed income stream alongside owner use.

Franck Bauguil, Senior Vice President of Yacht Ownership & Product Development for Leopard Catamarans and The Moorings, stated: "The refined Leopard 53 Powercat is a testament to our commitment to continuous innovation and listening to the needs of our global owners. We haven't just refreshed the finishes; we've optimised the experience at the same price point.

"The combination of its exceptional new living spaces, smart ergonomic design and enhanced level of comfort truly sets a new standard for luxury power catamaran cruising. It remains the ideal platform for both extended private voyages and successful charter ownership through The Moorings."

The 53 Powercat retains its efficient hull design and twin 370hp Yanmar engines, which offer top speeds up to 24 knots and an extensive range. The key focus of the redesign is the enhancement of the expansive exterior living areas, with the aft cockpit now available in a flexible 'Alfresco' modular furniture setup or the traditional fixed configuration.

The aft area benefits from an enhanced walk-through transom and optional redesigned electric lifting platform, which can be raised into position to extend the cockpit area or carry a tender, and be lowered to

provide a spacious swim platform.

The flybridge has been refined and now features a more spacious and comfortable seating layout with modular back cushions and new fabric, an upgraded helm station with improved visibility and ergonomics, and a sophisticated outdoor galley with an integrated sink, grill and refrigeration.

Other upgrades to the yacht include modernised cockpit lighting for ambiance and functionality, plus ambient and task flybridge lighting built into seating and structure for night use.

Inside, the saloon has undergone a major refresh, with redesigned seating, upgraded premium finishes and an enhanced connection between the galley, dining and lounge areas. In addition, all major systems are housed in a sealed engine room, substantially reducing engine noise and vibration.

The 53 Powercat continues to be offered with three or four en-suite cabins, with the owner's version providing a private suite in the starboard hull with a large island bed aft, spacious walk-in closet and en-suite bathroom forward.

The new flagship of the brand's Power range is scheduled to have its Asia debut at the Singapore Yachting Festival (April 23-26), where it will be part of another strong in-water display by Leopard at ONE°15 Marina Sentosa Cove. ☪
